#### **DETAILED ACTION**

#### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David M. Mundt, Esq., the applicant's attorney, on March 31, 2005.

## **IN THE SPECIFICATION:**

In page 2, after "the resulting output" as recited in line 24, "of the resampling system" has been inserted.

### IN THE CLAIMS:

In claim 1, after "the resulting output" as recited in line 14, "of the resampling system" has been inserted.

In claim 9, after "the resulting output" as recited in line 19, "of the second resampling system" has been inserted.

In claim 12, after "the resulting output" as recited in line 13, "of a resampling system" has been inserted.

# Allowable Subject Matter

2. Claims 1 - 19 are allowed. The following is an examiner's statement of reasons for allowance:

Regarding to the claimed invention, the prior art of record fails to show or render obvious of a method and its corresponding of a data transmission system for aligning and synchronizing data between a local and a remote source of data, comprising:

Initially sampling local source data at an original sampling rate;

Receiving sampled data from the remote source;

Transmitting sampled local source data to the remote source;

Delaying the sampled local source data;

Re-sampling the delayed local source data and the received data from the remote source at a selected re-sampling rate, wherein the resulting output of a resampling system is such that the remote data is aligned with the local data at the local source.

Banik et al. and Robert et al. differ from the claim invention that they lack of the step of a reesampling system for resampling the delayed local source and the received data from the remote source at a selected resampling rate, wherein the resulting output of the resampling system is such that the remote data is aligned with the local data at the local source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 09/827,513

Art Unit: 2631

Banik et al. (US patent # 6,650,874 B1) discloses the real-time slow drift correction of

alignment of handset's local oscillator for cordless telephone.

Robert et al. (US patent # 6,256,592) discloses the multi-ended fault location system.

**Contact Information** 

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dung X. Nguyen whose telephone number is (571) 272-3010.

The examiner can normally be reached on Monday through Friday from 8:00 AM to 17:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Mr. Ghayour H. Mohammad can be reached on (571) 272-3021. The fax phone

numbers for this group is (571) 273-3021.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (571) 272-2600.
